INTRODUCING A NEW ERA IN FLIGHT SHAPE TECHNOLOGY...

ASPECT RATIO (AR) is the latest darting innovation from the UNIBOFFIN following extensive research into dart flight aerodynamics.

The wide front profile increases stability when the dart is in flight while the tapered rear area reduces drag to increase speed. Unlike conventional flights, the AR's corners have been purposely designed with large sweeping curves to reduce the possibility of incoming dart collisions and encourage tighter grouping. To round off the innovative design of the AR flight a new nose profile has been engineered for quicker and easier flight loading - a welcome feature for all dart players.

Available in two sizes, AR1 and AR2.

AR1 = EXTRA STABILITY THROUGH THE AIR

AR2 = MORE SPEED THROUGH THE AIR
