*Tomorrow's technology  
Today's Dart!*

### A breakthrough in Tungsten technology

Created by Unicorn design specialists using state-of-the-art scientific approach.

Ionised Titanium fed into a plasma of ionised Argon and Nitrogen creates titanium nitride which "grows" on the 90% Tungsten Alloy substrate. This costly technique coats the tungsten alloy surface with an ultra hard, wear and corrosion resistant compound at the same time beneficially improving texture and 'feel'.

### See the difference . . .

Gold distinction - a new look for darts  
MX black Slik Stik® patent shaft discreetly gold banded  
Golden Hi-Lite® metallic flights for better board visibility without glare  
Laser engraved Unicorn hallmark of quality  
Deluxe Designer case

### Feel the difference . . .

New texture, optimum "feel", grip without slip but the smoothest release yet  
Surface does not absorb natural oil in fingers - "feel" retained throughout its long life
